

p68 RNA Helicase Polyclonal Antibody

| BYab-01932 IgG |
|---|
| IgG |
| |
| Human;Mouse;Rat |
| WB;IF;ELISA |
| DDX5 |
| Probable ATP-dependent RNA helicase DDX5 |
| The antiserum was produced against synthesized peptide derived from human DDX5/DEAD-box Protein 5. AA range:565-614 |
| p68 RNA Helicase Polyclonal Antibody detects endogenous levels of p68 RNA Helicase protein. |
| Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. |
| Polyclonal, Rabbit,IgG |
| The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. |
| Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/20000. Not yet tested in other applications. |
| 1 mg/ml |
| ≥90% |
| -20°C/1 year |
| DDX5; G17P1; HELR; HLR1; Probable ATP-dependent RNA helicase DDX5; DEAD box protein 5; RNA helicase p68 |
| 70kD |
| Nucleus . Nucleus, nucleolus . Cytoplasm . During the G0 phase, predominantly located in the nucleus. Cytoplasmic levels increase during the G1/S phase. During the M phase, located at the vicinity of the condensed chromosomes. At G1, localizes in the cytoplasm. |
| Aorta endothelial cell, Epithelium, Human esophagus tumor, Muscle, |
| function:RNA-dependent ATPase activity. The rate of ATP hydrolysis is highly stimulated by single-stranded RNA. May be involved in pre-mRNA splicing.,PTM:Arg-502 is dimethylated, probably to asymmetric dimethylarginine.,similarity:Belongs to the DEAD box helicase family.,similarity:Belongs to the DEAD box helicase family. DDX5/DBP2 subfamily.,similarity:Contains 1 helicase ATP-binding domain.,similarity:Contains 1 helicase C-terminal domain.,subunit:Identified in the spliceosome C complex, at |

|---------------------------|--|
| Background | DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are putative RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA secondary structure, such as translation initiation, nuclear and mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution patterns, some members of this family are believed to be involved in embryogenesis, spermatogenesis, and cellular growth and division. This gene encodes a DEAD box protein, which is a RNA-dependent ATPase, and also a proliferation-associated nuclear antigen, specifically reacting with the simian virus 40 tumor antigen. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2016], |
| matters needing attention | Avoid repeated freezing and thawing! |
| Usage suggestions | This product can be used in immunological reaction related experiments. For more information, please consult technical personnel. |
