

## SPB6 Polyclonal Antibody

| Catalog No         | BYab-06159   |
|--------------------|--|
| Isotype            | lgG  |
| Reactivity         | Human;Mouse  |
| Applications       | WB;ELISA   |
| Gene Name          | SERPINB6 PI6 PTI   |
| Protein Name       | Serpin B6 (Cytoplasmic antiproteinase) (CAP) (Peptidase inhibitor 6) (PI-6)<br>(Placental thrombin inhibitor)  |
| Immunogen          | Synthesized peptide derived from part region of human protein  |
| Specificity        | SPB6 Polyclonal Antibody detects endogenous levels of protein.   |
| Formulation        | Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.   |
| Source             | Polyclonal, Rabbit,IgG   |
| Purification       | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  |
| Dilution           | WB 1:500-2000 ELISA 1:5000-20000   |
| Concentration      | 1 mg/ml  |
| Purity             | ≥90%   |
| Storage Stability  | -20°C/1 year   |
| Synonyms           |  |
| Observed Band      | 41kD   |
| Cell Pathway       | Cytoplasm .  |
| Tissue Specificity | Expressed in keratinocytes (at protein level). Highest levels in skeletal muscle.<br>Also found in placenta, cardiac muscle, lung, liver, kidney and pancreas.<br>Expressed in the inner ear hair cells. Expressed abundantly by normal mast cells<br>in different tissues and by mast cells in mastocytoma lesions.   |
| Function           | function:Inhibits thrombin.,similarity:Belongs to the serpin<br>family.,similarity:Belongs to the serpin family. Ov-serpin subfamily.,tissue<br>specificity:Highest levels in skeletal muscle. Also found in placenta, cardiac<br>muscle, lung, liver, kidney and pancreas.,   |
| Background         | The protein encoded by this gene is a member of the serpin (serine proteinase<br>inhibitor) superfamily, and ovalbumin(ov)-serpin subfamily. It was originally<br>discovered as a placental thrombin inhibitor. The mouse homolog was found to be<br>expressed in the hair cells of the inner ear. Mutations in this gene are associated<br>with nonsyndromic progressive hearing loss, suggesting that this serpin plays an |

|                           | important role in the inner ear in the protection against leakage of lysosomal content during stress, and that loss of this protection results in cell death and sensorineural hearing loss. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Sep 2010], |
|---------------------------|---|
| matters needing attention | Avoid repeated freezing and thawing!  |
| Usage suggestions         | This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.   |
