

FBX6 rabbit pAb

(F-box associated) domain., subunit: Part of a SCF (SKP1-cullin-F-box) protein ligase complex., Background This gene encodes a member of the F-box protein family which is characterized		
Reactivity Human; Mouse;Rat Applications WB Gene Name FBX06 FBG2 FBS2 FBX6 Protein Name FBX6 Immunogen Synthesized peptide derived from human FBX6 AA range: 30-80 Specificity This antibody detects endogenous levels of FBX6 at Human/Mouse/Rat Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1: 500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band Cell Pathway Cytoplasm . Tissue Specificity Function function:Probably recognizes and binds to some phosphorylated proteins and promotes their ubiquitination and degradation, online information:PBG2 similarity:Contains 1 F-BOx domain, similarity:Contains 1 F-BOx domain, similarity-Contains 1 F-BOx proteins constitute one of the four subunits of the buly duity in protein ligase complex. This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of the subiquition protein ligase complex.	Catalog No	BYab-11366
Applications Gene Name FBXO6 FBG2 FBS2 FBX6 Protein Name FBX6 Immunogen Synthesized peptide derived from human FBX6 AA range: 30-80 Specificity This antibody detects endogenous levels of FBX6 at Human/Mouse/Rat Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1: 500-2000 Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms Observed Band Cell Pathway Cytoplasm. Tissue Specificity Function function:Probably recognizes and binds to some phosphorylated proteins and promotes their ubiquitination and degradation, online information:hFBG2 similarity. Contains 1 F-box domain, similarity. Contains 1 F-Box domain, similarity-Contains 1 F-Box (F-box associated) domain, subunit:Part of a SCF (SKP1-cullin-F-box) protein ligase complex. Background This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of the ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination The F-box, proteins are divided into 3 classes: Fbws containing WD-40 domains,	Isotype	IgG
Gene Name FBX06 FBG2 FBS2 FBX6 Protein Name FBX6 Immunogen Synthesized peptide derived from human FBX6 AA range: 30-80 Specificity This antibody detects endogenous levels of FBX6 at Human/Mouse/Rat Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
