

ARL16 rabbit pAb

SourcePolyclonal, Rabbit,IgGPurificationThe antibody was affinity-purified from rabbit serum by affinity-chromatogra using specific immunogen.DilutionWB 1: 500-2000Concentration1 mg/mlPurity≥90%Storage Stability-20°C/1 yearSynonymsCytoplasm .Cell PathwayCytoplasm .Tissue Specificitysimilarity:Belongs to the small GTPase superfamily. Arf family.,BackgroundThe protein encoded by this gene belongs to the ARL (ADP-ribosylation factor-like) family of proteins, which are structurally related to ADP-ribosylation		
Reactivity Human;Rat;Mouse; Applications WB Gene Name ARL16 Protein Name ARL16 Immunogen Synthesized peptide derived from human ARL16 AA range: 96-146 Specificity This antibody detects endogenous levels of ARL16 at Human Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatograusing specific immunogen. Dilution WB 1: 500-2000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Cytoplasm . Tissue Specificity Function similarity:Belongs to the small GTPase superfamily. Arf family., Function similarity:Belongs to the small GTPase superfamily. Arf family., Background The pretien encoded by this gene belongs to the ARL (ADP-ribosylation factoP-ribosylation factoP-ribosylation factoP-ribosylation	og No E	BYab-12317
ApplicationsWBGene NameARL16Protein NameARL16ImmunogenSynthesized peptide derived from human ARL16 AA range: 96-146SpecificityThis antibody detects endogenous levels of ARL16 at HumanFormulationLiquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azideSourcePolyclonal, Rabbit, IgGPurificationThe antibody was affinity-purified from rabbit serum by affinity-chromatogra using specific immunogen.DilutionWB 1: 500-2000Concentration1 mg/mlPurity≥90%Storage Stability-20°C/1 yearSynonymsCytoplasm.Tissue SpecificityCytoplasm.Functionsimilarity:Belongs to the small GTPase superfamily. factors (ARFs). This protein has been shown to have an inhibitory role in th cellular antiviral response. This gene product interacts with the C-terminal of of the DEXD/H-box helicase 58 (DDX58) gene product. This interaction wa	f f c t r	factor-like) family of proteins, which are structurally related to ADP-ribosylation factors (ARFs). This protein has been shown to have an inhibitory role in the cellular antiviral response. This gene product interacts with the C-terminal domai of the DEXD/H-box helicase 58 (DDX58) gene product. This interaction was foun to suppress the association between the DDX58 gene product and RNA, thereby negatively regulating the activity of the DDX58 gene product. [provided by
