

PPGB (20k, Cleaved-Met327) rabbit pAb

Catalog No BYab-02309 Isotype IgG Reactivity Human;Mouse Applications WB;IHC Gene Name CTSA PPGB Protein Name PPGB (20k, Cleaved-Met327) Immunogen Synthesized peptide derived from human PPGB (20k, Cleaved-Met327) Specificity This antibody detects endogenous levels of Human Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000; IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4,16.5; Carboxypeptidase C; Carboxypeptidase L; Cathepsin A; Protective protein cathepsin A; PPCA; Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity		
Reactivity Human;Mouse Applications WB;IHC Gene Name CTSA PPGB Protein Name PPGB (20k, Cleaved-Met327) Immunogen Synthesized peptide derived from human PPGB (20k, Cleaved-Met327) Specificity This antibody detects endogenous levels of Human, Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5,Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;Protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein localization, intracellular transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization, i	Catalog No	BYab-02309
Applications WB;IHC Gene Name CTSA PPGB Protein Name PPGB (20k, Cleaved-Met327) Immunogen Synthesized peptide derived from human PPGB (20k, Cleaved-Met327) Specificity This antibody detects endogenous levels of Human,Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;Protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, [MIM:2564501]. It is an autosomal recessive disease, function-Protective protein protein protein CTSA are the cause of galactosialdosis specificity, disease:Defects in CTSA are the cause of galactosialdosis [MIM:2564501]. It is an autosomal recessive disease, function-Protective protein in CTSA are the cause of galactosialdosis [MIM:2564501]. It is an autosomal recessive disease, function-Protective protein	Isotype	IgG
Gene Name CTSA PPGB Protein Name PPGB (20k, Cleaved-Met327) Immunogen Synthesized peptide derived from human PPGB (20k, Cleaved-Met327) Specificity This antibody detects endogenous levels of Human, Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 92 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular macromolecule localization, catalytic activity; Release of a C-terminal amino acid with broad specificity, disease: Defects in CTSA	Reactivity	Human;Mouse
Protein Name PPGB (20k, Cleaved-Met327) Immunogen Synthesized peptide derived from human PPGB (20k, Cleaved-Met327) Specificity This antibody detects endogenous levels of Human, Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;Protective protein protective protein protective protein protective protein protective protein 20 kDa chain; Lysosomal protective protein 20 kDa chain; Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization, protein p	Applications	WB;IHC
Immunogen Synthesized peptide derived from human PPGB (20k, Cleaved-Met327) Specificity This antibody detects endogenous levels of Human, Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 92 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization, protein formacromolecule localization, intracellular transport, cellular macromolecule localization, protein formacromolecule localization, protein formacromolecu	Gene Name	CTSA PPGB
Specificity This antibody detects endogenous levels of Human, Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327) Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, specificity, disease: Defects in CTSA are the cause of galactosialidosis [MIM:256640]. It is an autosomal recessive diseases, function: Protective protein	Protein Name	PPGB (20k, Cleaved-Met327)
Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization; Protective protein [TSA are the cause of galactosialidosis [MM:256540], tis an autosomal recessive disease., function:Protective protein	Immunogen	Synthesized peptide derived from human PPGB (20k, Cleaved-Met327)
Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization, intracellular transport, cellular macromolecule localization; Protective protein [TSA are the cause of galactosialidosis [MM:256540], tis an autosomal recessive disease., function:Protective protein	Specificity	This antibody detects endogenous levels of Human, Mouse PPGB (20k, Cleaved-Met327, protein was cleaved amino acid sequence between 326-327)
Purification The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein localization, intracellular transport, cellular macromolecule localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, specificity, diseases:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease. function:Protective protein	Formulation	
using specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, acatalytic activity:Release of a C-terminal amino acid with broad specificity, disease:Defects in CTSA are the cause of galactosialidosis [MIM:256640]. It is an autosomal recessive disease.function:Protective protein	Source	Polyclonal, Rabbit,IgG
Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, Background catalytic activity:Release of a C-terminal amino acid with broad specificitydisease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive diseasefunction:Protective protein	Purification	
Purity ≥90% Storage Stability -20°C/1 year Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, appetituding specificity, disease: Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease, function: Protective protein	Dilution	WB 1:500-2000;IHC-p 1:50-300
Storage Stability -20°C/1 year Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, Background catalytic activity:Release of a C-terminal amino acid with broad specificity.,disease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease.,function:Protective protein	Concentration	1 mg/ml
Synonyms Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, catalytic activity: Release of a C-terminal amino acid with broad specificity., disease: Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease., function: Protective protein	Purity	≥90%
C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] Observed Band 20 52kD Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, catalytic activity:Release of a C-terminal amino acid with broad specificity.,disease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease.,function:Protective protein		
Cell Pathway Lysosome. Tissue Specificity Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, Background catalytic activity:Release of a C-terminal amino acid with broad specificity.,disease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease.,function:Protective protein	Storage Stability	-20°C/1 year
Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, Background catalytic activity:Release of a C-terminal amino acid with broad specificity.,disease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease.,function:Protective protein		Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal
Function proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, Background catalytic activity:Release of a C-terminal amino acid with broad specificity.,disease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease.,function:Protective protein	Synonyms	Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain]
transport, cellular protein localization, establishment of protein localization, intracellular transport, cellular macromolecule localization, Background catalytic activity:Release of a C-terminal amino acid with broad specificity.,disease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease.,function:Protective protein	Synonyms Observed Band	Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] 20 52kD
specificity.,disease:Defects in CTSA are the cause of galactosialidosis [MIM:256540]. It is an autosomal recessive disease.,function:Protective protein	Synonyms Observed Band Cell Pathway	Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] 20 52kD
	Synonyms Observed Band Cell Pathway Tissue Specificity	Lysosomal protective protein (EC 3.4.16.5;Carboxypeptidase C;Carboxypeptidase L;Cathepsin A;Protective protein cathepsin A;PPCA;Protective protein for beta-galactosidase) [Cleaved into: Lysosomal protective protein 32 kDa chain; Lysosomal protective protein 20 kDa chain] 20 52kD Lysosome. proteolysis, intracellular protein transport, protein localization, protein transport, cellular protein localization, establishment of protein

	neuraminidase, it associates with these enzymes and exerts a protective function necessary for their stability and activity. This protein is also a carboxypeptidase and can deamidate tachykinins.,similarity:Belongs to the peptidase S10 family.,subunit:Heterodimer of a 32 kDa chain and a 20 kDa chain; disulfide-linked.,
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.

Products Images

Immunohistochemical analysis of paraffin-embedded human uterus. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).
