

Mindin Polyclonal Antibody

Catalog No BYab-17049 Isotype IgG Reactivity Human;Mouse;Rat;Monkey Applications WB;IHC Gene Name SPON2 Protein Name Spondin-2 Immunogen The antiserum was produced against synthesized peptide derived from human SPON2. AA range:71-120 Specificity Mindin Polyclonal Antibody detects endogenous levels of Mindin protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000;IHC-p 1:50-300 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms SPON2; DIL1; Spondin-2; Differentially expressed in cancerous and non-cancerous lung cells 1; DIL-1; Mindin Observed Band 37kD Cell Pathway Secreted, extracellular space, extracellular matrix Tissue Specificity Expressed in normal lung tissue but not in lung carcinoma cell lines. Function fünction:Cell adhesion protein th

Purity ≥90% Storage Stability -20°C/1 year Synonyms SPON2; DIL1; Spondin-2; Differentially expressed in cancerous and non-cancerous lung cells 1; DIL-1; Mindin Observed Band 37kD Cell Pathway Secreted, extracellular space, extracellular matrix. Tissue Specificity Expressed in normal lung tissue but not in lung carcinoma cell lines. Function function:Cell adhesion protein that promote adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Dilution	WB 1:500-2000;IHC-p 1:50-300
Storage Stability -20°C/1 year Sponyms SPON2; DIL1; Spondin-2; Differentially expressed in cancerous and non-cancerous lung cells 1; DIL-1; Mindin Observed Band 37kD Cell Pathway Secreted, extracellular space, extracellular matrix. Tissue Specificity Expressed in normal lung tissue but not in lung carcinoma cell lines. Function function:Cell adhesion protein that promote adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Concentration	1 mg/ml
Synonyms SPON2; DIL1; Spondin-2; Differentially expressed in cancerous and non-cancerous lung cells 1; DIL-1; Mindin Observed Band 37kD Cell Pathway Secreted, extracellular space, extracellular matrix. Expressed in normal lung tissue but not in lung carcinoma cell lines. Function function:Cell adhesion protein that promote adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Purity	≥90%
non-cancerous lung cells 1; DIL-1; Mindin Observed Band 37kD Cell Pathway Secreted, extracellular space, extracellular matrix. Expressed in normal lung tissue but not in lung carcinoma cell lines. Function function:Cell adhesion protein that promote adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Storage Stability	-20°C/1 year
Cell Pathway Secreted, extracellular space, extracellular matrix. Expressed in normal lung tissue but not in lung carcinoma cell lines. Function function:Cell adhesion protein that promote adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Synonyms	•
Tissue Specificity Expressed in normal lung tissue but not in lung carcinoma cell lines. function: Cell adhesion protein that promote adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Observed Band	37kD
function: Cell adhesion protein that promote adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Cell Pathway	Secreted, extracellular space, extracellular matrix .
hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung	Tissue Specificity	Expressed in normal lung tissue but not in lung carcinoma cell lines.
	Function	hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens.,similarity:Contains 1 spondin domain.,similarity:Contains 1 TSP type-1 domain.,tissue specificity:Expressed in normal lung tissues but not in lung

Western Blot analysis of COS-7 cells using Mindin Polyclonal Antibody

Western blot analysis of the lysates from HUVECcells using SPON2 antibody.

Immunohistochemical analysis of paraffin-embedded human lung cancer. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).
